

The project aims to create datasets for modeling insurance rates across California for Auto, Home, and Landlord products. These datasets are utilized extensively by the Actuarial department in various other projects.

Thorough exploration of the source transactional system (SPInn) was conducted to retrieve historical data, focusing on mid-term changes. SCD Type 2 dimensions for risk items (DIM\_VEHICLE, DIM\_DRIVER, DIM\_BUILDING) were created specifically for this project initially, and then, have been consistently leveraged across multiple projects.

The dataset granularity operates at the policy mid-term level, capturing any alterations that could impact the risk assessment of a policy. This dataset offers a depth of complexity, featuring intricate measures derived from analytical functions, capping mechanisms, and sophisticated policy and claims data linkage, providing insights beyond the conventional 6- or 12-month periods found in other datasets.

## Process

Aurora	Redshift

## Property Notes

General Notes
Each row is a policy mid-term change. If a change starts in one year and ends in an other year, the data are separated by calendar year.
All coverage info (WP, EP, Limits and Deductibles) are in each line (one record per all coverages)
Claims amounts and counts are aggregated per mid-term change, few perils categories, coverages and catastrophe.
it is NOT in the views. If there is a payment or an other money movement in a 3 month old claim made yesterday, the claim amounts are
Most recent (2 month old) mid-term changes and claims are not in the view but in the underlying tables and can be easily added.
usable for modeling. Can be removed

Mid Term Changes
Adding or removing new location
Changes in Deductibles CovA, CovB, CovC, CovD
Changes in Limits CovA, CovB, CovC, CovD, CovE, CovF
Changes in Premiums CovA, CovB, CovC, CovD, CovE, CovF
Building.UsageType
Change in MultiPolicy Discount (Auto)
Change in MultiPolicyDiscount (Umbrella)
Change in Earthquake policy discount
Change in Multiple Landlord
Change in Protective Devices (sprinklersystem,FireAlarmType,BurglaryAlarmType,WaterDetectionDevice,NeighborhoodCrimeWatchInd )
CSE Agent
Change in Rental Insurance Verification (building.rentersinsurance), 447
Change in Property Manager Discount
Homegard Credit
Change in Secondary Residence (ADDR Coverage) existence or premium
but supposed to be calculated based on some data. The data in PRODCSE_DW (dates) are not consistent with the discount values in SPINN

Property View Structure

## Auto Notes 1

General Notes
Each row is a policy mid-term change. If a change starts in one year and ends in an other year, the data are separated by calendar year. (2 rows)
Each mid-term change is repeated for all coverages. There are Limits, Deductibles, WP, EP and ECY for each coverage as well as coll_deductible,comp_deductible,bi_limit1,bi_limit2,umbi_limit1,umbi_limit2,pd_limit1,pd_limit2 in each row despite a coverage for easy filtering.
Claim amounts and counts are aggregated per coverage, catastrophe and mid-term change and then capped
If a claim loss date is 2 month ago, it is in the data, if a loss date is yesterday, it is NOT in the view. If there is a payment or an other money movement in a 2 month old claim made yesterday, the claim amounts are changed.
RiskTypes included: PrivatePassangerAuto, Antique, GoldCart, MotorHome, Trailer
Each row in the data is a mid-term change and has StartDateTm and EndDateTm
There are 143 vehicle attributes and 59 drivers attributes plus policy and coverage attributes. Instead of checking a change in each of them (and some changes are just corrections without involving premiums) several importan events were choosen as a base.

Mid-term change	Comment
An other driver assigned to a vehicle	It's a most complex part because there are duplicate Driver and Vehicle numbers, DriverLicence numbers, VIN numbers, replacments of VINs or DriverLicense and other infor instead of a proper changing status to Delete and creating a new entity
A new driver added	
A new vehicle added	
A vehicle is removed	
A driver is removed	
A change in COLL or COMP deductibles	
A change in any coverage (See Coverage Groupng) limits	
A change in any coverage (See Coverage Groupng) premiums

## Auto Notes 2

**Capping** - each claim related column (loss amount or claim count) has suffix and calculated according to the conditions:

Column suffix	Condition	Threshold
_le500	Loss <b>Less</b> or Equal	500
_1000	Loss Greater then	1,000
_1500	Loss Greater then	1,500
_2000	Loss Greater then	2,000
_2500	Loss Greater then	2,500
_5k	Loss Greater then	5,000
_10k	Loss Greater then	10,000
_25k	Loss Greater then	25,000
_50k	Loss Greater then	50,000
_100k	Loss Greater then	100,000
_250k	Loss Greater then	250,000
_500k	Loss Greater then	500,000
_750k	Loss Greater then	750,000
_1M	Loss Greater then	1,000,000

### Special capping for BI, UMBI and UIMBI losses only

#### 1st Step

lossinc15	case when sum(fc.loss_pd_amt_itd + fc.loss_rsrv_chng_amt_itd - fc.subro_rcv_chng_amt_itd - fc.salvage_rcv_chng_amt_itd)>=15000 then 15000 else null end
lossinc25	case when sum(fc.loss_pd_amt_itd + fc.loss_rsrv_chng_amt_itd - fc.subro_rcv_chng_amt_itd - fc.salvage_rcv_chng_amt_itd)>=25000 then 25000 else null end

## Auto Notes 2

lossinc50	case when sum(fc.loss_pd_amt_itd + fc.loss_rsrv_chng_amt_itd - fc.subro_recv_chng_amt_itd - fc.salvage_recv_chng_amt_itd)>=50000 then 50000 else null end
lossinc100	case when sum(fc.loss_pd_amt_itd + fc.loss_rsrv_chng_amt_itd - fc.subro_recv_chng_amt_itd - fc.salvage_recv_chng_amt_itd)>=100000 then 100000 else null end
2nd Step	
lossinc1530	case when sum(isnull(lossinc15,lossinc))>=30000 then 30000 else sum(isnull(lossinc15,lossinc)) end
lossinc2550	case when sum(isnull(lossinc25,lossinc))>=50000 then 50000 else sum(isnull(lossinc25,lossinc)) end
lossinc50100	case when sum(isnull(lossinc50,lossinc))>=100000 then 100000 else sum(isnull(lossinc50,lossinc)) end
lossinc100300	case when sum(isnull(lossinc100,lossinc))>=300000 then 300000 else sum(isnull(lossinc100,lossinc)) end
